

FEATURED STUDY

New and Ongoing Study!

ASSOCIATION BETWEEN PARENTAL GAMBLING PROBLEMS AND PARENT- YOUTH RELATIONSHIPS

A survey of 1000 parents of
youth in Manitoba

PARENT GAMBLING AND PARENT-YOUTH RELATIONSHIPS

Non-gamblers vs. Non-problem Gamblers

Compared to parents who don't gamble, parents who gambled but did not have a gambling problem had...

Lower odds of talking or playing with their youth just for fun

Higher odds that their youth saw or heard adults in their house yelling at each other in the past 12 months

Survey with 1000 Manitoban parents who had a child between 14-17 years old in 2017-2018

PARENT GAMBLING AND PARENT-YOUTH RELATIONSHIPS

Non-gamblers vs. At-risk/Problem Gamblers

Compared to parents who don't gamble, parents with a gambling problem had...

Higher odds that their youth saw or heard adults in their house yelling at each other in the past 12 months

Lower odds of hugging their youth

Higher odds that their youth saw or heard adults say hurtful or mean things to another adult in their home in the past 12 months

Survey with 1000 Manitoban parents who had a child between 14-17 years old in 2017-2018

PARENT GAMBLING AND PARENT-YOUTH RELATIONSHIPS

Conclusion:
Parent-gambling affects parent-youth relationships

FUTURE DIRECTIONS

- ✓ We need more research on the impact of parental-gambling on parent-child relationships.
- ✓ We need more research on protective factors for parents and children.
- ✓ We need better supports for parents with gambling problems.

Stay tuned for more information as the study develops !
